This report is the international pre Authority under Article 35 and tre	liminary examination rep ansmitted to the applicant	ort, established by this according to Article	s International Preliminary Examining 36.
2. This REPORT consists of a total of	of 7 sheets	, including this cover	sheet.
3. This report is also accompanied by	y ANNEXES, comprising	:	
a. (sent to the applicant	and to the International E	<i>Bureau)</i> a total of	sheets, as follows:
sheets of the description, claims and/or drawings which have been amended and are the basis of this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).			
sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box.			
b. (sent to the Internation	nal Ruman onhi) a total o	f (indicate time and n	umber of electronic carrier(s))
dem to the incident			
, containing a sequence listing and/or tables related thereto, in electronic form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions).			
4. This report contains indications re	lating to the following ite	ms:	
Box No. I Basis of	the report		
Box No. II Priority			
Box No. III Non-est	Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability		
Box No. IV Lack of unity of invention			
Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial			
applicability; citations and explanations supporting such statement Box No. VI Certain documents cited			
Box No. VII Certain defects in the international application			
Box No. VIII Certain observations on the international application			
Date of submission of the demand		Data of completion	SA:
Date of submission of the demand Date of completion of this report

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/SE2004/001583

Box	No. I	Basis of the report	
1.	With n	egard to the language, this report is based on:	
	the international application in the language in which it was filed		
		a translation of the international application into which is the language of a translation furnished for the purposes of:	
		international search (Rules 12.3(a) and 23.1(b))	
		publication of the international application (Rule 12.4(a))	
		international preliminary examination (Rules 55.2(a) and/or 55.3(a))	
2.	furnish	regard to the elements of the international application, this report is based on (replacement sheets which have been ned to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" to not annexed to this report):	
	\boxtimes	the international application as originally filed/furnished	
		the description:	
		pages as originally filed/furnished	
		pages* received by this Authority on	
		pages* received by this Authority on	
		the claims:	
		pages as originally filed/furnished	
		pages* as amended (together with any statement) under Article 19	
		pages* received by this Authority on	
		pages* received by this Authority on	
		the drawings:	
		pages as originally filed/furnished	
		pages* received by this Authority on	
		pages* received by this Authority on	
		a sequence listing and/or any related table(s) – see Supplemental Box Relating to Sequence Listing.	
3.		The amendments have resulted in the cancellation of:	
		the description, pages	
		the claims, Nos	
		the drawings, sheets/figs	
		the sequence listing (specify):	
		any table(s) related to the sequence listing (specify):	
4.		This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).	
		the description, pages	
		About the Man	
		the drawings, sheets/figs	
		the sequence listing (specify):	
		any table(s) related to the sequence listing (specify):	
•		4 applies, some or all of those sheets may be marked "superseded."	

Form PCT/IPEA/409 (Box No. 1) (April 2005)

International application No.

PCT/SE2004/001583

Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
	citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims Claims	4.8.11-15.20-31.33.37.40-44.52 See Supplemental Box	YES NO
Inventive step (IS)	Claims Claims	4. 8. 15. 20-31. 44 1-3.5-7.9-14.16-19.32-43.45-53	YES NO
Industrial applicability (IA)	Claims Claims	1-53	_ YES _ NO

2. Citations and explanations (Rule 70.7)

The invention relates to a chromatography matrix, wherein the ligands provide a chemical gradient in the support. This leads to improved mass transport properties during adsorption and desorption.

The most relevant documents cited in the International Search Report are:

D1: US6426315 B1 D2: US5561097 A D3: US6528322 B1 D4: US5977345 A

D1 relates to a process for preparing multifunctional porous separation matrices by introducing different functionalities in different layers of the matrix (col. 2, lines 1-45; col. 6, lines 17-26). The process includes contacting a separation matrix that comprises reactive groups with a reagent (e.g. activating agent), the amount of which is not sufficient for reaction with all groups present in the matrix. Desired functionality can be introduced in a subsequent step. The substitution degree of one ligand in one layer is often different from the substitution degree of the same ligand in another layer. A ligand in the surface layer can be zero and at the same time present in another layer. Also, the reverse can be true. Suitable matrices are in the form of particles (col. 3, line 47 - col. 4, line 38). Charged ligands can be used (col. 4, line 57 - col. 5, line 25).

The invention according to claims 1-3, 5-7, 9, 10, 16-19, 32, 34-36, 38, 39, 45-51 and 53 lacks novelty in view of D1.

INTERNATIONAL PRELIMINARY REPORT ON PATENTARILITY

International application No.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY	PCT/SE2004/001583	
Supplemental Box		
in case the space in any of the preceding boxes is not sufficient. Continuation of: Box V		
NOVELTY, NO: 1-3,5-7,9,10,16-19,32,34-36,3	8,39,45-51,53	

PCT/SE2004/001583

Supplemental Box

In case the space in any of the preceding boxes is not sufficient. Continuation of: $Box\ V$

The remaining claims 11-14, 33, 40-43 and 52 are considered to involve particular detail executions obvious to a person skilled in the art. Therefore, the invention according to these claims is not considered to involve an inventive step.

Claims 33 and 37 relates to two methods of coupling ligands to the separation matrix. These methods are not disclosed in D1. However, they are both known through D2. The first method is disclosed in the background art of D2 (col. 1, lines 22-26) and the second method is disclosed in the detailed description (col. 3, lines 58-66 and col. 5, line 24-35). The use of these methods in the invention according to claims 33 and 37 has not been shown to give rise to any unexpected effects. It is therefore considered to be obvious to a person skilled in the art to use the methods described in D2 in order to produce a matrix with a ligand density gradient as disclosed in D1. Consequently, the invention according to claims 33 and 37 lacks an inventive step with respect to D1 in combination with D2.

The invention also lacks novelty in view of D3. D3 discloses an analytical method for determination of two analytes in a sample by thin layer chromatography. The separation zone may have different ligand densities or a gradient of ligand densities along the separation direction.

The invention according to claims 1, 3, 10, 47, 49, 50 and 53 lacks novelty in view of D3.

See also D4, which discloses chromatographic affinity matrices with higher concentration of ligand or ionic moiety in the intra-particle volume than the outer matrix surface (abstract and claims).

The invention according to claims 1-3, 11-14, 16-19 and 47-53 lacks novelty in view of D4.

The invention according to claims 4, 8, 15, 20-31, 44 is however novel and considered to involve an inventive step.

The invention is also considered to be industrially applicable.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/SE2004/001583

Box No. VIII Certain observations on the international application

The following observations on the claims of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

The term "solvent controlled diffusion" used in claim 20 is vague and unclear and leave the reader in doubt as to the meaning of the technical feature to which it refers, thereby rendering the definition of the subject-matter of said claim unclear (Article 6 PCT).

Claim 40 does not meet the requirements of Article 6 PCT in that the matter for which protection is sought is not clearly defined. The claim attempts to define the invention in terms of the result to be achieved, which merely amounts to a statement of the underlying problem. The technical features necessary for achieving this result should be added to the claim.

Claim 37 relates to independent claim 32 and the steps (a) - (c). These steps cannot be replaced by a single step as defined in claim 37 as it would conflict with the independent claim 32.
